Imperium Assist

“Assisting people to
gain power in a time
of crisis”

Energetic Imperials

Storyboard for...

Imperium Assist Mobile App created by Group A3 #19

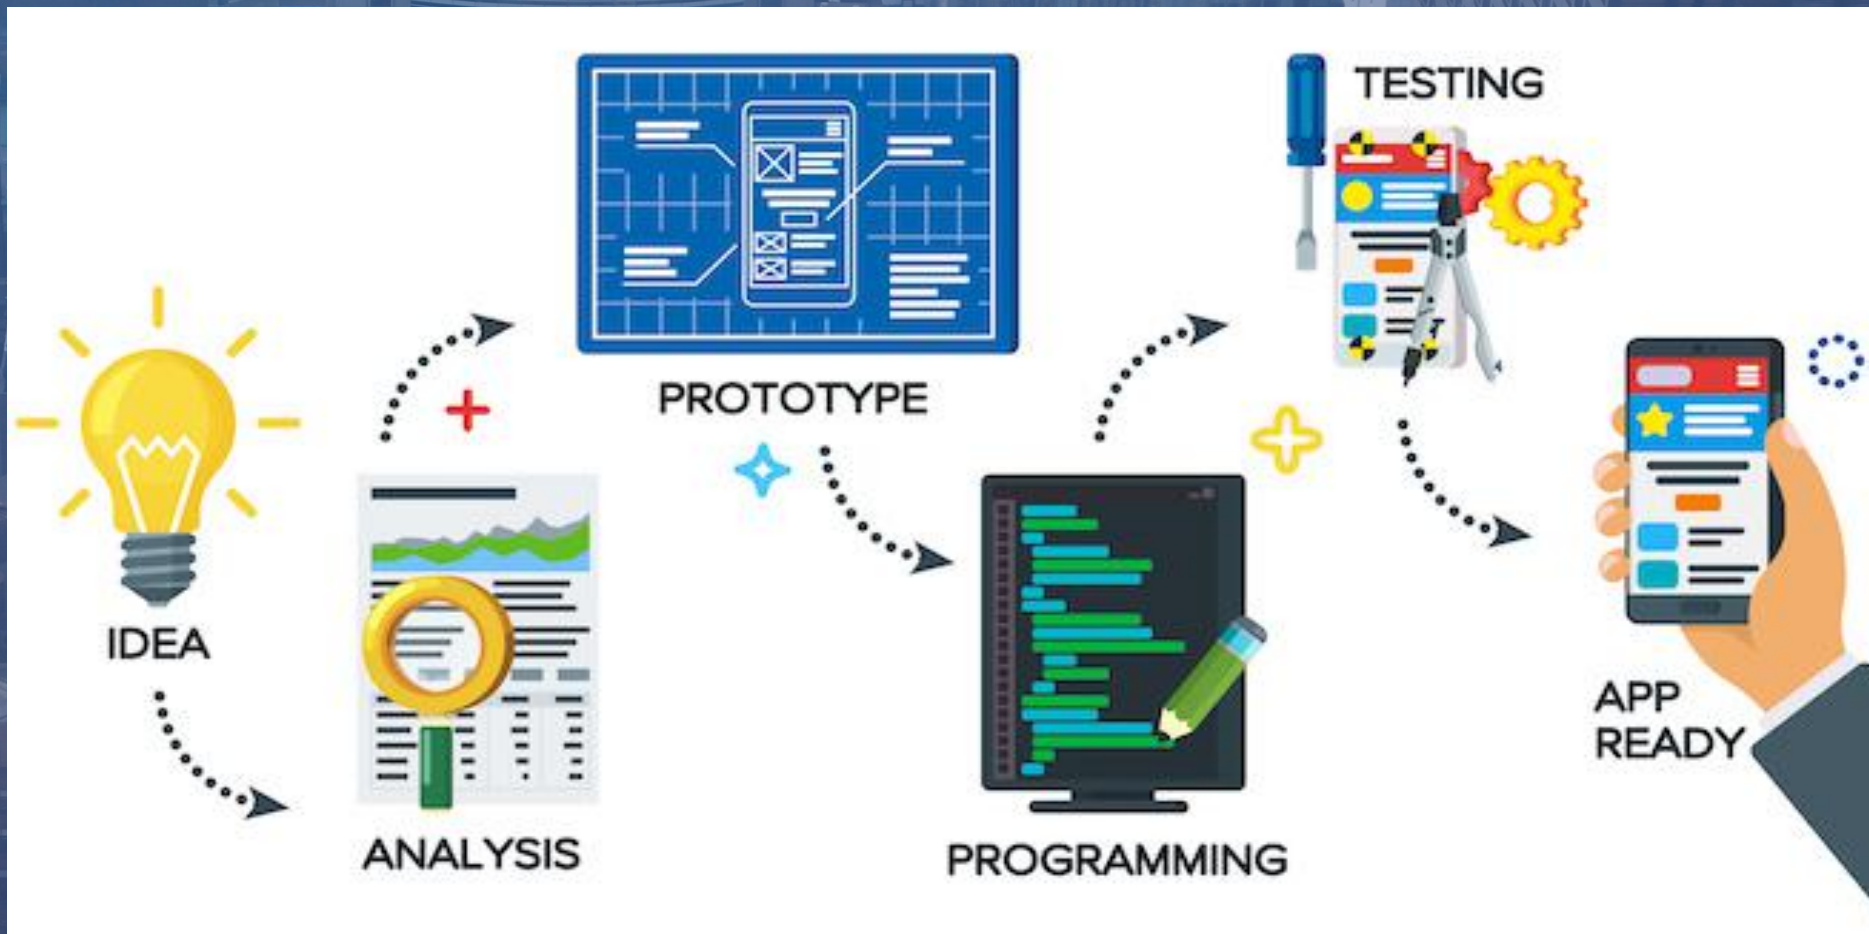

Energetic Imperials will be creating an app that assists people in a time of crisis. This app will help people stay connected to others, have professionals to discuss mental health challenges with and keep updated with changes in the current climate and news.

At this stage, the app would be primarily based around support for those who have tested positive to COVID-19 with the opportunity to use it for other health issues and crisis's in the future.

Due to the current climate people around the world are living in and our recognition of individuals struggling with the isolation associated with COVID-19.

“IMPERIUM MEANS ABSOLUTE POWER” - ASSISTING PEOPLE TO GAIN POWER IN A TIME OF CRISIS

OVERALL STRUCTURE

Mobile App Objective

The app has been designed to help people through this hard virus time we are experiencing in Australia at the moment and Globally in the future.

The app will help people stay connected to others, have professionals to discuss mental health challenges with and keep updated with changes in the current climate and news. At this stage, the app would be primarily based around support for those who have tested positive to COVID-9 with the opportunity to use it for other health crisis's in the future.

The app will need to be started from scratch and will be compatible to any Android or IOS device, you can just download it and have access to support chat rooms with others in similar situations, mental health professionals such as psychologists, access to handy tips and tricks to get through the crisis such as isolation essentials for COVID-19 and access to government updates and news about the crisis.

“Imperium means absolute power and that is what we are trying to do here, assist people to gain power in this time of crisis.”

Description of App

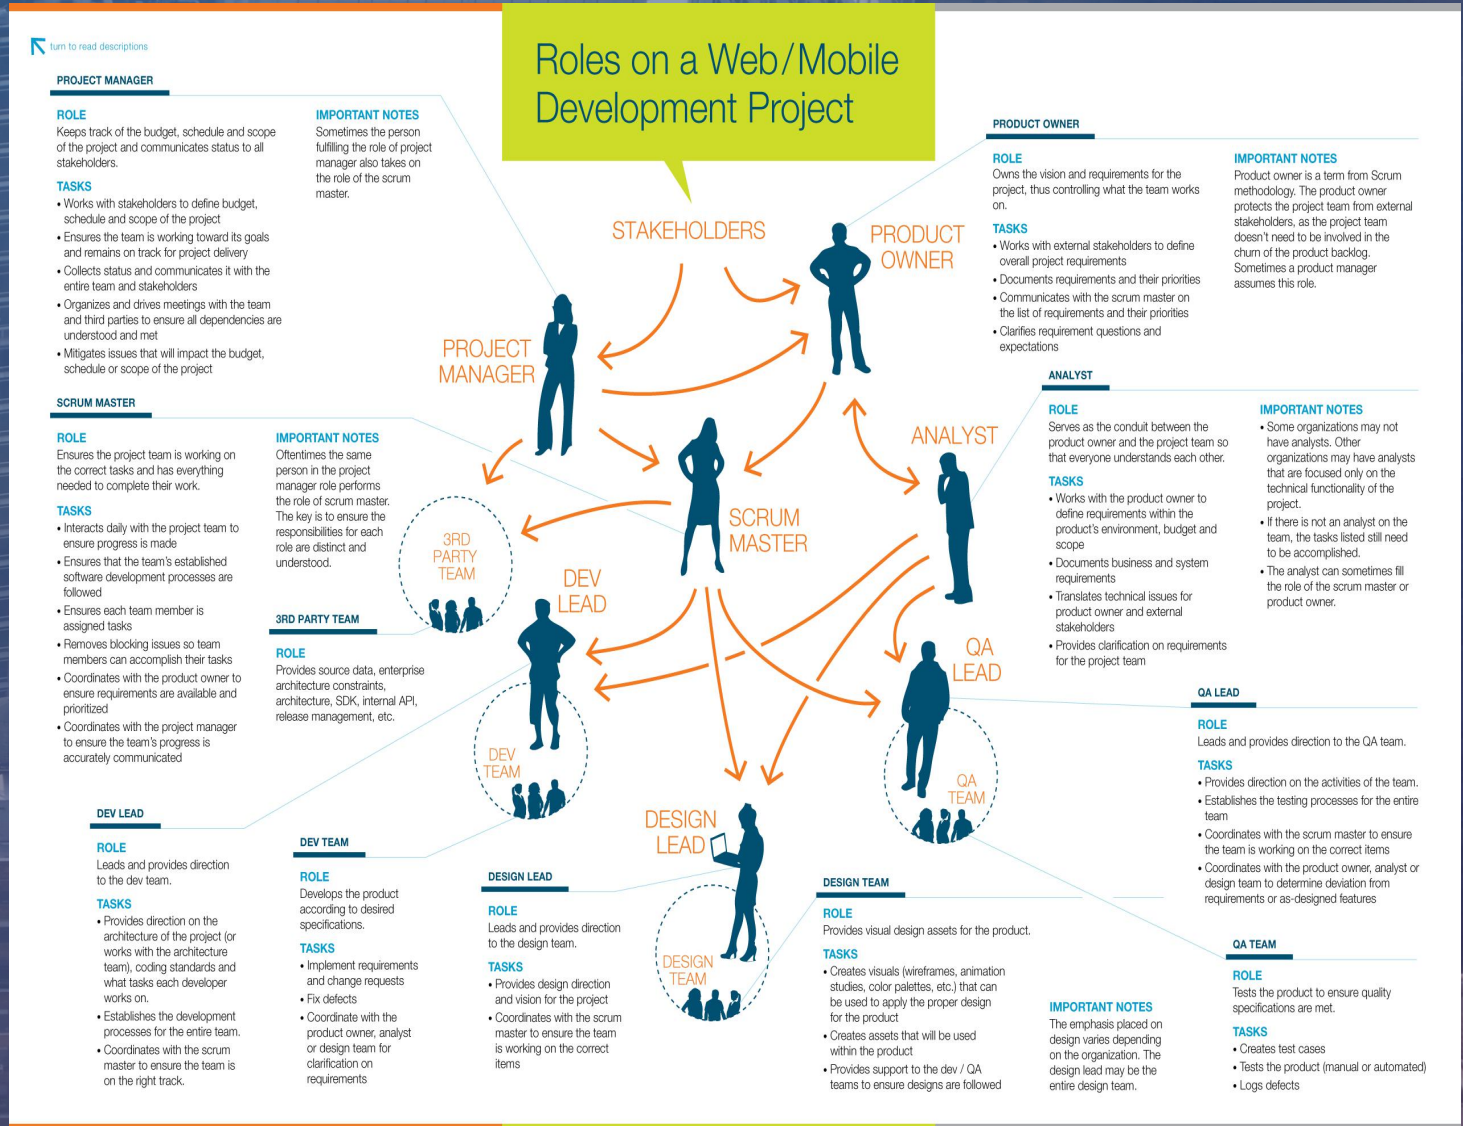

Our app will include the following features within different tabs in the app:

1. Access via a chat room or phone number to mental health professionals for help for those users who are struggling with the many different aspects involved with a crisis like COVID-19. Users will be able to turn notifications on for this section if they have chosen to message a health professional so they can see when they receive replies. Examples of the struggles that professionals may be able to help with include depression due to isolation and a such a large change in lifestyle, anxiety from the economic and social environment, abusive relationships from trapped environments etc.
2. A chatline where users can interact with other individuals who may also feel isolated due to a positive test or who are struggling with their symptoms or lack thereof. People will be able to chat to others in the same or similar situation as themselves, either as themselves or anonymously if they so choose. Hopefully, this chat system will allow users to talk about their experiences and troubles associated with COVID-19 and find people that are in similar situations to them to help each other feel supported and less isolated. This section will also allow for notifications to be turned on if a user wishes to know when another user has replied to them.
3. A section where people can upload handy tips and tricks to help others get through COVID-19 in a successful and positive way. This may be lists of essentials for a 14-day isolation period for those either testing positive or being in contact with COVID-19 or those returning from overseas. This section may also include lists of activities or projects that others have found enjoyable through their isolation periods.
4. A volunteer's section where those who are healthy and able to access goods and services and want to help those struggling can access and offer help and support. This may include things such as picking up essential supplies for people and dropping them to their houses or even doing game or puzzle swaps for people in isolation.
5. A government update and news section that includes the current COVID-19 restrictions that are in place within the user's area as well as any government updates, press releases and news updates for the current crisis. Notifications for this section may be turned on to allow people to have real time updates of the COVID-19 environment.

A mockup of a mobile app interface for login and sign-up. It features a light blue background with rounded corners. At the top, the word "Email" is displayed. Below it is a white input field with a blue border containing the placeholder text "Your Email". Underneath the input field is a solid dark blue button with the text "Sign In" in white. Below the button is another white input field with a blue border containing the text "Sign Up". At the bottom of the screen is a navigation bar with five icons and labels: a flame icon for "COVID", a pencil icon for "News", a paper plane icon for "Chat", a lightning bolt icon for "Gov Update", and a gear icon for "Volunteer". A large white circle is positioned at the very bottom center of the screen.

FUNDED BY BOTH THE
GOVERNMENT AND
HEALTH ORGANISATIONS

ABSOLUTELY FREE

USER FRIENDLY

Platform - Tools - Technologies

App will be compatible with both Android and IOS and Windows

In order to successfully make this app our team needs to have:

- Modern coding languages such as HTML5, Java, C++, Objective-C, Swift and or C#
- Skills in cloud infrastructure e.g. Microsoft Azure or Amazon Web Services
- Cross platform capabilities e.g. able to adapt to Android, iOS or Windows
- Skills in data engineering
- A way to make the app secure e.g. OAuth
- Good team cohesion including open and clear communication, clear goals and efficient leadership

Estimated Budget and Timeframe for Development

Estimated Timeframe

Software
Requirements and
Design: 2-4 weeks

Software App
Planning: 1-2 weeks

Software App

stage

Testing &
Deployment stage

Ongoing support &
Maintenance stage

Outcome

“A successful outcome will be an app that helps those living in the current COVID-19 climate have a less isolated, less traumatic and information enriched experience. The success of the app will also see less people struggling with mental illness that originally predicted when we eventually get through the COVID-19 pandemic”

Radio Interview Script - Draft

5 Minutes Air Spot

with

Imperium Assist CEO – CEO (Name)

Sunshine Radio's 5am Project

Radio Host James – Welcome back to Sunshine Radio's 5am Project, it is quarter to 6 here in Melbourne and it has just hit 10 degrees on your hump day morning.

We are here this morning with CEO the CEO of Imperium Assist to talk about a new app that is being released this week. The app has been designed to help us through this hard virus time we are experiencing in Melbourne at the moment. CEO can you tell us a bit about the name of the app to start with, what does Imperium Assist mean and stand for?

CEO – Good morning James and thank you for having me on the show this morning. Imperium Assist was thought of by one of our founding staff members, Caroline. Imperium means absolute power and that is what we are trying to do here, assist people to gain power in this time of crisis.

Radio Host James – Ooo yes, I like it CEO, such a great idea and name, tell me more about the app and what people will use it for.

CEO – Well James we are seeing and hearing stories of people and businesses struggling every day on the news, radio or even just as we walk down the street. I only saw yesterday a new figure of heightened depression rates and we just want to help people get through this crisis and anything like this that happens in the future like the bushfires earlier this year. So the app will be compatible to any android or ios device, you can just download it and have access to support chat rooms with others in similar situations, mental health professionals such as psychologists, access to handy tips and tricks to get through the crisis such as isolation essentials for COVID-19 and access to government updates and news about the crisis.

Radio Host James – This sounds like a great tool to help people out at the moment CEO, I like where you have gone with this idea. You were telling me in the add break about a volunteer element on the app, can you explain that to our listeners?

CEO – Yes absolutely, there is a volunteer's section in the app where people can sign up to help others out who are doing it a bit tougher than themselves. For example, during COVID-19 the volunteer might go and do some food shopping for those in isolation or during the bushfires they might have organised some bedding and shelter for people. It provides a way for people that can and want to help, a way to communicate with those affected and assist them.

Radio Host James – So CEO, you are saying that if we have any listeners out there this morning that want to help, they should download the app and become a volunteer and try and help.

CEO - Yes absolutely, if you feel like you want to help out in this crisis or any in the future download the app, its called Imperium Assist and see what you can do.

Radio Host James – So CEO can you tell me, does the app cost anything?

CEO – Yes James it is absolutely free for all that need support and for volunteers, the app is completely funded by both the government and health organisations so there will be no payment for the app and no “upgrade to premium here” pitches once you have downloaded the app.

Radio Host James – That’s awesome CEO, nothing worse than the old upgrade here pitch in an app. I have just had some questions come in from some of our listeners would you like to answer a few?

CEO - Yes absolutely go ahead.

Radio Host James – ok great, first up, Jesse would like to know how hard it will be to use the app, she isn’t very good with technology but does have a smart phone, can you answer that one for Jesse?

CEO - Hi Jesse, thank you for your question. Being user friendly was one thing we invested a lot of time and resources in and was one of our key goals. We wanted people of all technology skill levels to be able to use the app so we have tried to make it as simple and easy to use as possible. This may need a bit more work as we get some feedback in, and we are willing to make changes as requested by consumers.

Radio Host James – Thanks CEO. Another question from Peter, he would like to know if this is just for people in Melbourne or if it is an Australia wide app?

CEO – Ah great question Peter, that is something I should have mentioned earlier, this app will actually be worldwide. When you first download the app, it will ask for your country and language. Once you are into the app you can select state, for example Victoria, and then narrow it down to a post code so you are talking to people with the same issues as you in your area and the volunteers will also be close to you and able to help with more ease.

Radio Host James – This sounds like such a great service CEO but unfortunately that is all we have time for this morning, thank you so much for your time CEO and everyone get on downloading Imperium Assist from your app store and start helping each other.

CEO – Thank you for having me James and thanks to everyone for your questions.
